

# Sprint 2 Report, FridayFinder, Tribe115A, 5/9/23

Project Board: <https://github.com/orgs/CSE115-project/projects/2>

## • Actions to stop doing:

- We are satisfied with our current process because we are working as a team, and have accomplished all our user stories.

## • Actions to start doing:

- Communicate more
  - To ensure that we are on the same page and everybody knows what has been done
- Schedule more group work sessions
  - Each member was assigned certain tasks and these tasks are dependent on one another. Some member are more knowledgeable about certain tasks than others, working together helps ensure a more efficient work flow

## • Actions to keep doing:

- Meeting after class
  - Keep everyone up to date with what has been accomplished
- Use voice chat online for communication and code reviews
  - Good way to keep up to date in real time
- Working individually
  - Allows for more work to be done in the same period of time
- Communicate with each other to avoid branch/merge conflicts
  - Ensure more time working rather than debugging

## • Work completed/not completed:

### Completed

- 2.1 As a user, I want to create a profile so that my personal information is saved [3]
  - connect firebase database (2-4 hours)
  - add component for user profile (2 hours)
  - link database to user profile (2-4 hours)

- add form for user profile (2 hours)
- create a model for user profile (2-4 hours)
- create profile button (2 hours)
- create profile component (2 hours)

### **Not completed**

- 2.2 As a user, I want to save custom data so that it can be displayed on my profile [5]
  - add custom fields to user profile (2 hours)
  - create edit button for user profile and related route (2-4 hours)
  - create form for editing profile (2 hours)
  - create save button for editing profile (2 hours)
  - check to make sure database is consistent (2 hours)
- 2.3 As a user, I want to display an image or avatar so that others know who I am [5]
  - implement image upload on edit form component (2-4 hours)
  - Add image upload component (1-2 hours)

### **• Work completion rate:**

Total number of user stories completed: 3 user stories

Total number of estimated ideal work hours completed: 38 hours

Total number of days during the prior sprint: 14 days

The user stories/day and ideal work hours/day figures:  $\frac{1.5}{14} \approx 0.107$  user stories/day

$$\frac{29}{14} \approx 2.714 \text{ ideal work hours/day}$$

The final sprint burnup chart should be available for viewing in the lab and an email of this chart sent to the TA/prof:
