Sprint 4 Report, FridayFinder, Tribe115A, 6/6/23

Project Board: https://github.com/orgs/CSE115-project/projects/2

· Actions to stop doing:

- We are satisfied with our current process because we are working as a team, and have accomplished all our user stories.

· Actions to start doing:

- Communicate more
    - To ensure that we are on the same page and everybody knows what has been done
- Schedule more group work sessions
    - Each member was assigned certain tasks and these tasks are dependent on one another. Some member are more knowledgeable about certain tasks than others, working together helps ensure a more efficient work flow
- Demo the user story before marking it as complete
    - This help to ensure that the feature that you're working on is complete and functional

· Actions to keep doing:

- Meeting after class
    - Keep everyone up to date with what has been accomplished
- Use voice chat online for communication and code reviews
    - Good way to keep up to date in real time
- Working individually
    - Allows for more work to be done in the same period of time
- Communicate with each other to avoid branch/merge conflicts
    - Ensure more time working rather than debugging

· Work completed/not completed:

Completed

- 4.1 As a user, I want to be able to change location so that I can see a new set of attractions [5]
    - Checkbox of predefined type of attractions   (5-7 hours)

- Search input to change location   (5-7 hours)

- 4.2 As a user, I want to save liked places [8]   (14-16 hours)

    - Click to display restaurant details: address, phone number, ratings

    - Add to like places button

    - List like places in profile

- 4.3 As a user, I want to navigate to my friend's profile [5]

    - Similar to user's profile (without edit button)   (5-7 hours)

- (Extra) Refine map [5]   (5-10 hours)

    - Change marker

    - Refine the intensity and radius

· Work completion rate:

Total number of user stories completed:

- 3 user stories completed
- ½ of 3.2 user story

Total number of estimated ideal work hours completed: 47 hours

Total number of days during the prior sprint: 14 days

The user stories/day and ideal work hours/day figures: $\frac{4.5}{14} \approx 0.321$ user stories/day

$$\frac{47}{14} \approx 3.36 \text{ ideal work hours/day}$$

The final sprint burnup chart should be available for viewing in the lab and an email of this chart sent to the TA/prof:
